

LAB 2 – REQUIREMENT ANALYSIS

Output:

- Functional and Non-functional Requirements
- Risk Register
- Resource Requirement

Submission: Please follow the form below to submit your lab report, including the requirement register, risk register, and resource register.

1. Functional and Non-functional Requirements

In this part, solution requirements are defined. Solution requirements describe the characteristics that a product must have to meet the needs of the business. There are two types of solution requirements:

- Functional requirements describe how the product must behave and what are its features and functions.
- Non-functional requirements describe the general characteristics of a system. They are also known as quality attributes.

Example:

Req.ID	Requirement Name	Detailed Description	Type
001	Register an account	If the user doesn't have an account, then he will be asked to register.	Functional requirement
002	Compare between books	Customers can compare between two or more books to choose the best one.	Functional Requirement
003	Live chat	An online chat on the site where customers could instantly receive answers to their questions.	Functional Requirement
004	Usability Requirements	The interface is easy to learn and navigate; buttons, headings, and help/error messages are simple to understand	Non-functional Requirement
005	Security Requirement	All communications between the system's data server and clients must be encrypted	Non-functional requirement
006		Failure to log in the website (five times or more) should lead to a ban from access the website within 24 hours.	Non-functional requirement

2. Risk Register

In this part, a list of identified risks and other information are defined.

- Risk Category: Some common categories are scope, schedule, cost, quality, HR.
- Risk title: a one-sentence description of a risk.
- Affect: A narrative description of the potential impact on the project.
- Probability: the likelihood of risk to happen. You can use Low, Medium, High
- Impact if the risk occurs: You can use Low, Medium, High
- Risk response plan: Actions to respond the risk.

Risk ID	Risk Category	Risk Title	Affect	Probability	Impact	Risk response plan
001	HR	Members lack of team corporation, or weak participation	This can slow down the progress of the project, produce unreliable result from the uncooperative work	Medium	Low	Organize team members so that they can easily get along with each other. Solve all the conflicts that are existing among the team members
002	Requirements	Additional requirements are added	It affects on the project progress	High	Medium	Hold a meeting to update schedule and plan
003	Organization and Management	Project is running over the budget	The project has to be stopped if the team ran out of the budget	Medium	High	Project Manager must propose a new saving plan or financial management

3. Resources Requirement

Resource Requirements for the project are divided into 3 parts: hardware resource, software resource and human resource.

3.1 Hardware Resource

Items	Quantity	Description	Purpose	Price	Total Cost	Date needed
Lenovo System x3500 M5	1	System Server	Data Server			
....	...			...	...	...
Total Cost:						

3.2 Software Resource

Application	Quantity	Description	Purpose	Price	Total Cost	Date needed
MS Windows 10 Pro 64bit	10	Operating System	PC's OS			
....	...			...	...	...
Total Cost:						

3.3 Human Resource

Name	Name of Organization	Project Role	Required Skills	Phone	Email	Salary/month
....		Project Manager				
....		Business Analyst				
Total Cost:
