

LAB 8 – TESTING

No.	Name	ID
1	Nguyen Dinh Khanh Ngan	ITCSIU22236
2	Phan Tran Thanh Huy	ITCSIU22056
3	Nguyen Huu Thuy	ITCSIU22141

1.

Test Case #: 1.1	Test Case Name: User Login
System: Game Management Platform	Subsystem: User Authentication
Designed by: Nguyen Dinh Khanh Ngan	Design Date: 20/8/2024
Executed by: Nguyen Dinh Khanh Ngan	Execution Date: 10/11/2024
Short Description: Test the user login functionality	

Pre-conditions
• The user already has a valid registered account. • The system is online and accessible • The login page is loaded

Step	Action	Expected System Response	Pass/Fail	Comments
1	Enter a valid username and password	The system validates the input and enables the "Login" button	Pass	The "Login" button was correctly enabled upon entering valid credentials
2	Click the "Login" button	The system redirects the user to the dashboard	Pass	Redirected to the user dashboard successfully
3	Enter an invalid password	The system displays an error message: "Invalid credentials"	Pass	The system displayed the correct "Invalid credentials" error message

4	Leave fields blank and click "Login"	The system prompts the user to fill in all fields	Pass	The prompt appeared asking the user to fill in all fields

Post-Conditions
• The user is logged in successfully if the credentials are valid • Invalid attempts do not compromise the platform's security

2.

Test Case #: 1.2	Test Case Name: Game Addition by Admin
System: Game Management Platform	Subsystem: Admin Panel
Designed by: Nguyen Huu Thuy	Design Date: 23/9/2024
Executed by: Phan Tran Thanh Huy	Execution Date: 12/11/
Short Description: Test the ability of an admin to add a new game to the platform	

Pre-conditions
• Admin has valid credentials and is logged in • Admin access to the game addition page

Step	Action	Expected System Response	Pass/Fail	Comments
1	Navigate to the "Add Game" page	The system displays the game addition form	Pass	The "Add Game" page loaded correctly
2	Enter valid game details (title, genre, release date)	The system accepts the input and enables the "Submit" button	Pass	The system validated the game details and enabled the "Submit" button

3	Click the "Submit" button	The system displays a success message: "Game added successfully"	Fail	The "Game added successfully" message did not display due to a backend error
4	Leave a required field blank and click "Submit"	The system prompts the admin to fill in the missing fields	Pass	Proper error message displayed for the missing fields

Post-Conditions
The new game is added to the database and is visible to users on the platform

3.

Test Case #: 1.3	Test Case Name: Searching for a Game
System: Game Management Platform	Subsystem: Game Search
Designed by: Nguyen Huu Thuy	Design Date: 8/10/2023
Executed by: Nguyen Dinh Khanh Ngan	Execution Date: 9/11/2024
Short Description: Test the functionality of the game search feature	

Pre-conditions
- The user is logged in. - The platform contains a list of games.

Step	Action	Expected System Response	Pass/Fail	Comments
1	Enter a valid game name in the search bar and hit "Enter"	The system displays the game(s) matching the search query	Pass	Search results matched the entered game name

2	Enter an invalid game name in the search bar and hit "Enter"	The system displays "No results found"	Fail	"No results found" was not displayed for an invalid game name due to a backend error
3	Leave the search bar empty and hit "Enter"	The system displays all available games	Pass	All available games were displayed when the search bar was left empty

Post-Conditions
The search results accurately match the query provided by the user

4.

Test Case #: 1.4	Test Case Name: Deleting a Game by Admin
System: Game Management Platform	Subsystem: Admin Panel
Designed by: Nguyen Dinh Khanh Ngan	Design Date: 20/10/2024
Executed by: Phan Tran Thanh Huy	Execution Date: 10/11/2024
Short Description: Test the ability of an admin to delete a game from the platform	

Pre-conditions
- Admin is logged in - The platform has a game already added to the database

Step	Action	Expected System Response	Pass/Fail	Comments
1	Navigate to the game list	The system displays all games with a "Delete" button next to each	Pass	The game list was displayed correctly,

				showing the "Delete" button for each game
2	Click the "Delete" button for a specific game	The system asks for confirmation before deleting	Pass	A confirmation dialogue was prompted before the deletion
3	Confirm deletion	The system removes the game and displays "Game deleted successfully"	Pass	The game was successfully deleted, and the success message appeared
4	Cancel the deletion process	The system retains the game in the database	Pass	The game remained in the database when the deletion process was cancelled

Post-Conditions

- The selected game is removed from the database upon confirmation
- No unintended deletions occur
